Volume fell on the last day by **-2 million** shares and in total, **2** million shares were bought and sold for approximately **\$16.62** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-9.20%** during the next 3 months and, with a 90% probability hold a price between **\$5.37** and **\$9.00** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Beyond Meat Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$7.47** and **\$7.25**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, April 24, 2024**, and so far it has risen 36.63%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

Beyond Meat Inc. finds support from accumulated volume at **\$8.23** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$8.51**, **\$9.77** and **\$9.83**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk".
