## Tech commentaries:

The **General Cannabis Corp** stock price gained **6.00%** on the last trading day (Wednesday, 27th Mar 2024), rising from **\$0.0866** to **\$0.0918**. During the last trading day the stock fluctuated **6.62%** from a day low at **\$0.0861** to a day high of **\$0.0918**. The price has risen in 8 of the last 10 days and is up by **22.4%** over the past 2 weeks. Volume fell on the last day by **-4 thousand** shares and in total, **96 thousand** shares were bought and sold for approximately **\$8.85 thousand**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the upper part of a very wide and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$0.0946** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **10.00%** during the next 3 months and, with a 90% probability hold a price between **\$0.0769** and **\$0.104** at the end of this 3-month period.

The **General Cannabis Corp** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$0.0826** and **\$0.0801**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, March 13, 2024**, and so far it has risen 22.40%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the stock finds support just below today's level from accumulated volume at **\$0.0800** and **\$0.0750**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **\$0.0057** between high and low, or **6.62%**. For the last week the stock has had daily average volatility of **15.40%**.

**General Cannabis Corp** holds several positive signals and is within a weak rising trend. As the old saying says, "Let the trend be your friend.". We therefore consider it to be a good choice at these current levels and we are expecting further gains during the next 3 months. We have upgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Strong Buy candidate.

**Risk: Medium**
