Tech commentaries:

Cord Blood America, Inc. fell by **-0.14%** in the last day (Friday, 16th Aug 2019) from **\$0.01** to **\$0.01** and has now fallen 3 days in a row. During the day the stock fluctuated **3.47%** from a day low at **\$0.01** to a day high of **\$0.01**. The price has fallen in 6 of the last 10 days and is down by **-1.1%** for this period. Volume fell in the last day along with the stock, which is actually a good sign as volume should follow the stock. In the last day the trading volume fell by **-784 789** shares and in total **3 500** shares bought and sold for approximately **\$25.27**.

Cord Blood America, Inc. is moving within a wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Cord Blood America, Inc.** with a 90% probability to be traded between \$0.01 and \$0.01 at the end of this period with 90% probability. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the roof. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

There are few to none technical positive signals at the moment. **Cord Blood America, Inc.** holds sales signals from both short- and long-term moving averages. In addition, there is a general sales signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up there will be some resistance from the lines at **\$0.01** and **\$0.01**. A break-up above any of these levels will issue buy signals. A sales signal was issued from a pivot top point on **Friday August 09, 2019**, which indicates further falls until a new bottom pivot has been found. Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

RSI14 is **46** and the stock is currently not being overbought or oversold

Cord Blood America, Inc. finds support from accumulated volume at \$0.01. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.01**, **\$0.01** and **\$0.01**.

In general the stock tends to have controlled movements, but the low liquidity has increased the risk substantially.

Cord Blood America, Inc. holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
