The price has been going up and down for this period, and there has been a 4.26% gain for the last 2 weeks. The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. On corrections down, there will be some support from the lines at **\$34.28** and **\$34.34**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, April 24, 2024**, and so far it has fallen -1.46%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

On the downside, the stock finds support just below today's level from accumulated volume at **\$32.70** and **\$31.31**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$35.04**, **\$35.71** and **\$35.82**.
