## Tech commentaries:

The **The Gorman-Rupp Company** stock price gained **6.14%** on the last trading day (Friday, 26th Apr 2024), rising from **\$31.45** to **\$33.38**. During the last trading day the stock fluctuated **6.79%** from a day low at **\$31.39** to a day high of **\$33.52**. The price has fallen in 7 of the last 10 days and is down by **-9%** for this period. Volume fell on the last day by **-94 thousand** shares and in total, **161 thousand** shares were bought and sold for approximately **\$5.39** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **4.31%** during the next 3 months and, with a 90% probability hold a price between **\$32.83** and **\$41.81** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Thursday, April 25, 2024**, and so far it has risen 6.14%. Further rise is indicated until a new top pivot has been found. Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **The Gorman-Rupp Company** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$35.15** and **\$37.32**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **\$31.45**. On the upside the stock meets some resistance from accumulated volume at **\$35.99**, **\$36.02** and **\$36.74**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$2.13** between high and low, or **6.79%**. For the last week, the stock has had daily average volatility of **5.88%**.

The **The Gorman-Rupp Company** stock holds several negative signals and despite the positive trend, we believe **The Gorman-Rupp Company** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
