MACD:	Buy

Tech commentaries:

The **SILVERSUN TECH** stock price fell by **-5.42%** on the last day (Wednesday, 24th Apr 2024) from **\$13.66** to **\$12.92**. During the last trading day the stock fluctuated **5.94%** from a day low at **\$12.80** to a day high of **\$13.56**. The price has risen in 6 of the last 10 days and is up by **2.3%** over the past 2 weeks. Volume has increased on the last day by **19 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **31** thousand shares were bought and sold for approximately **\$401.39** thousand.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$12.32** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-6.59%** during the next 3 months and, with a 90% probability hold a price between **\$11.50** and **\$16.00** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **SILVERSUN TECH** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$13.88** and **\$13.46**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Wednesday, April 17, 2024**, and so far it has fallen **-17.13%**. Further fall is indicated until a new bottom pivot has been found. **SILVERSUN TECH** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

SILVERSUN TECH finds support from accumulated volume at **\$12.55** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$13.71**, **\$13.90** and **\$15.89**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.760** between high and low, or **5.94%**. For the last week, the stock has had daily average volatility of **8.52%**.

SILVERSUN TECH holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
