A buy signal was issued from a pivot bottom point on **Monday, April 15, 2024**, and so far it has risen 1.57%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Atlassian Corporation Plc** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock.
