The price has risen in 6 of the last 10 days but is still down by **-7.08%** for this period. Volume fell on the last day by **-167 thousand** shares and in total, **1 million** shares were bought and sold for approximately **\$283.10** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **5.11%** during the next 3 months and, with a 90% probability hold a price between **\$217.70** and **\$244.79** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Wednesday, April 17, 2024**, and so far it has risen 3.72%. Further rise is indicated until a new top pivot has been found. Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **The Travelers Companies Inc** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$215.80** and **\$222.49**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

The **The Travelers Companies Inc** finds support from accumulated volume at **\$210.98** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
