Tech commentaries:

The **VICTORYSHARES DIVIDEND ACCELERATOR** ETF price gained **0.536%** on the last trading day (Monday, 22nd Apr 2024), rising from **\$47.92** to **\$48.18**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the ETF fluctuated **0.89%** from a day low at **\$47.92** to a day high of **\$48.35**. The price has fallen in 6 of the last 10 days and is down by **-2.53%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **3 thousand** more shares were traded than the day before. In total, **13 thousand** shares were bought and sold for approximately **\$638.59** thousand.

The ETF lies in the lower part of a weak rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$47.69** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the ETF is expected to rise **3.74%** during the next 3 months and, with a 90% probability hold a price between **\$49.47** and **\$52.70** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Wednesday, April 17, 2024**, and so far it has risen 1.21%. Further rise is indicated until a new top pivot has been found. **VICTORYSHARES DIVIDEND ACCELERATOR** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **VICTORYSHARES DIVIDEND ACCELERATOR** ETF holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the ETF giving a more negative forecast for the stock. On further gains, the ETF will meet resistance from the long-term Moving Average at **\$49.11**. On a fall, the ETF will find some support from the short-term average at **\$47.90**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

VICTORYSHARES DIVIDEND ACCELERATOR finds support from accumulated volume at **\$47.77** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$48.82**, **\$49.24** and **\$49.32**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.426** between high and low, or **0.89%**. For the last week the ETF has had daily average volatility of **0.742%**.

VICTORYSHARES DIVIDEND ACCELERATOR holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low
