Tech commentaries:

The **Hitejinro Holdings Co., Ltd.** stock price fell by **-0.0840%** on the last day (Friday, 31st May 2024) from **?11,900.00** to **?11,890.00**. During the last trading day the stock fluctuated **0.0841%** from a day low at **?11,890.00** to a day high of **?11,900.00**. The price has fallen in 6 of the last 10 days and is down by **-0.08%** for this period.

The stock is moving within a horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Hitejinro Holdings Co., Ltd.** stock with a 90% probability to be traded between **?11,351.84** and **?12,409.17** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Wednesday, May 29, 2024**, and so far it has risen 0.763%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Hitejinro Holdings Co., Ltd.** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **?11,976.29**. On a fall, the stock will find some support from the short-term average at **?11,878.57**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day, which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk.

Hitejinro Holdings Co., Ltd. finds support from accumulated volume at **?11,880.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **?11,970.00**, **?12,000.00** and **?12,080.00**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **?10.00** between high and low, or **0.0841%**. For the last week the stock has had daily average volatility of **0.440%**.

Hitejinro Holdings Co., Ltd. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
