The price has risen in 6 of the last 10 days but is still down by **-0.14%** for this period. The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. A buy signal was issued from a pivot bottom point on **Thursday, May 02, 2024**, and so far it has risen 3.13%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.
