The stock is moving within a very wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **CCCG Real Estate Corp Ltd** stock with a 90% probability to be traded between **¥8.80** and **¥11.46** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **CCCG Real Estate Corp Ltd** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **¥9.49** and **¥9.92**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, April 24, 2024**, and so far it has risen 12.91%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

CCCG Real Estate Corp Ltd finds support from accumulated volume at **¥9.81** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **¥10.60**, **¥10.98** and **¥11.50**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **¥0.550** between high and low, or **5.53%**. For the last week, the stock has had daily average volatility of **8.94%**.

Several short-term signals are positive and we conclude that the current level may hold a buying opportunity, as there is a fair chance for **CCCG Real Estate Corp Ltd** stock to perform well in the short-term period.
