Tech commentaries:

The **ShaanXi Provincial Natural Gas Co., Ltd.** stock price gained **1.21%** on the last trading day (Tuesday, 30th Apr 2024), rising from **¥7.41** to **¥7.50**. It has now gained 6 days in a row. It is not often that stocks manage to gain so many days in a row, and falls for a day or two should be expected. During the last trading day the stock fluctuated **6.51%** from a day low at **¥7.07** to a day high of **¥7.53**. The price has risen in 8 of the last 10 days and is up by **13.29%** over the past 2 weeks. Volume fell on the last day by **-929 thousand** shares and in total, **14 million** shares were bought and sold for approximately **¥107.33** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

Given the current short-term trend, the stock is expected to rise **10.34%** during the next 3 months and, with a 90% probability hold a price between **¥7.30** and **¥8.28** at the end of this 3-month period.

Mostly positive signals in the chart today. The **ShaanXi Provincial Natural Gas Co., Ltd.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **¥7.16** and **¥6.71**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, February 05, 2024**, and so far it has risen 26.05%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

On the downside, the stock finds support just below today's level from accumulated volume at **¥6.95** and **¥6.53**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **¥0.460** between high and low, or **6.51%**. For the last week, the stock has had daily average volatility of **7.68%**.

ShaanXi Provincial Natural Gas Co., Ltd. holds several positive signals and is within a strong rising trend. As the old saying says, "Let the trend be your friend." We therefore consider it to be a good choice at these current levels and we are expecting further gains during the next 3 months. We have upgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Strong Buy candidate.

Risk: **Medium**

Evaluation: **Strong Buy Candidate**
