Tech commentaries:

The **Shenzhen New Nanshan Holding Grp Co Ltd** stock price gained **1.46%** on the last trading day (Tuesday, 25th Jun 2024), rising from **¥2.05** to **¥2.08**. During the last trading day the stock fluctuated **5.97%** from a day low at **¥2.01** to a day high of **¥2.13**. The price has been going up and down for this period, and there has been a **-6.73%** loss for the last 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **3 million** more shares were traded than the day before. In total, **19 million** shares were bought and sold for approximately **¥40.25** million.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **¥2.05** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-9.35%** during the next 3 months and, with a 90% probability hold a price between **¥1.85** and **¥2.35** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Monday, June 24, 2024**, and so far it has risen 1.46%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Shenzhen New Nanshan Holding Grp Co Ltd** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **¥2.13** and **¥2.36**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Shenzhen New Nanshan Holding Grp Co Ltd finds support from accumulated volume at **¥2.05** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **¥2.38**, **¥2.46** and **¥2.58**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **¥0.120** between high and low, or **5.97%**. For the last week, the stock has had daily average volatility of **4.48%**.

Shenzhen New Nanshan Holding Grp Co Ltd holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. We have upgraded our analysis conclusion for this stock since the last evaluation from a Strong Sell to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
