Tech commentaries:

The **Integrated Electronic Systems Lab** stock price gained **9.98%** on the last trading day (Friday, 26th Apr 2024), rising from **¥5.81** to **¥6.39**. It has now gained 4 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **12.30%** from a day low at **¥5.69** to a day high of **¥6.39**. The price has risen in 6 of the last 10 days and is up by **3.4%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **20 million** more shares were traded than the day before. In total, **26 million** shares were bought and sold for approximately **¥165.97** million.

The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **13.09%** during the next 3 months and, with a 90% probability hold a price between **¥5.84** and **¥7.83** at the end of this 3-month period.

The **Integrated Electronic Systems Lab** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **¥5.76** and **¥6.17**. A breakdown below any of these levels will issue sell signals. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, March 21, 2024**, and so far it has fallen -3.03%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **¥5.96** and **¥5.93**. On the upside the stock meets some resistance just above today's level from accumulated volume at **¥6.42**, **¥6.49** and **¥6.56**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **¥0.700** between high and low, or **12.30%**. For the last week, the stock has had daily average volatility of **6.04%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Integrated Electronic Systems Lab** stock to perform well in the short-term. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Buy candidate.

Risk: High

Evaluation: Buy Candidate
