The price has fallen in 7 of the last 10 days and is down by **-8.46%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-6.68%** during the next 3 months and, with a 90% probability hold a price between **¥1.88** and **¥2.54** at the end of this 3-month period.

There are mixed signals in the stock today. The **Chengdu Road & Bridge Engineering Co Ltd** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **¥2.57**. On a fall, the stock will find some support from the short-term average at **¥2.36**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Tuesday, April 02, 2024**, and so far it has fallen **-14.39%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Chengdu Road & Bridge Engineering Co Ltd finds support from accumulated volume at **¥2.34** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **¥2.61**, **¥2.65** and **¥2.69**.
