Tech commentaries:

The **TCC Steel Corp.** stock price gained **5.23%** on the last trading day (Wednesday, 26th Jun 2024), rising from **751,600.00** to **754,300.00**. During the last trading day the stock fluctuated **5.09%** from a day low at **753,000.00** to a day high of **755,700.00**. The price has fallen in 6 of the last 10 days and is down by **-8.59%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **118 thousand** more shares were traded than the day before. In total, **362 thousand** shares were bought and sold for approximately **719.68** billion.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-5.18%** during the next 3 months and, with a 90% probability hold a price between **741,965.56** and **757,264.43** at the end of this 3-month period.

The **TCC Steel Corp.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **754,271.43** and **752,067.14**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 11, 2024**, and so far it has fallen -10.98%. Further fall is indicated until a new bottom pivot has been found.

TCC Steel Corp. finds support from accumulated volume at **754,000.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **754,500.00**, **756,100.00** and **761,000.00**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **72,700.00** between high and low, or **5.09%**. For the last week, the stock has had daily average volatility of **5.98%**.

TCC Steel Corp. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: High

Evaluation: Hold/Accumulate
