The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. The **Jiangsu Gaoke Petrochemical Co., Ltd** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. A sell signal was issued from a pivot top point on **Friday, May 10, 2024**, and so far it has fallen **-15.02%**. Further fall is indicated until a new bottom pivot has been found. Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.
