Given the current short-term trend, the stock is expected to rise **23.69%** during the next 3 months and, with a 90% probability hold a price between **¥24.48** and **¥27.81** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development.
