During the last trading day the stock fluctuated **3.93%** from a day low at **¥14.24** to a day high of **¥14.80**. The price has risen in 9 of the last 10 days and is up by **15.2%** over the past 2 weeks. Volume fell on the last day by **-443 thousand** shares and in total, **3 million** shares were bought and sold for approximately **¥46.62** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock is moving within a very wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Chongqing Pharscin Pharmaceutical Co Ltd** stock with a 90% probability to be traded between **¥12.53** and **¥15.83** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Mostly positive signals in the chart today. The **Chongqing Pharscin Pharmaceutical Co Ltd** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **¥13.97** and **¥14.01**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Tuesday, April 16, 2024**, and so far it has risen 20.10%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

**Chongqing Pharscin Pharmaceutical Co Ltd** finds support from accumulated volume at **¥14.69** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
