The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. The **SAJO SEAFOOD Co.,Ltd** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On a fall, the stock will find some support from the long-term average at approximately **₩3,769.29**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, May 24, 2024**, and so far it has fallen -8.35%. Further fall is indicated until a new bottom pivot has been found.

On the upside the stock meets some resistance just above today's level from accumulated volume at **₩4,420.00**, **₩4,530.00** and **₩4,730.00**.
