## Tech commentaries:

The **Sino Golf Holdings Limited** stock price gained **2.13%** on the last trading day (Friday, 28th Jun 2024), rising from **HK\$0.0470** to **HK\$0.0480**. During the last trading day the stock fluctuated **0%** from a day low at **HK\$0.0480** to a day high of **HK\$0.0480**. The price has been going up and down for this period, and there has been a **-2.04%** loss for the last 2 weeks.

The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **28.49%** during the next 3 months and, with a 90% probability hold a price between **HK\$0.0555** and **HK\$0.0652** at the end of this 3-month period.

The **Sino Golf Holdings Limited** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **HK\$0.0471** and **HK\$0.0442**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 18, 2024**, and so far it has fallen -2.04%. Further fall is indicated until a new bottom pivot has been found. Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the stock finds support just below today's level from accumulated volume at **HK\$0.0420** and **HK\$0.0400**. On the upside the stock meets some resistance just above today's level from accumulated volume at **HK\$0.0490**.

This stock may move much during the day (volatility) and with periodic low trading volume this stock is considered to be "high risk". During the last day, the stock moved **HK\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **2.63%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Sino Golf Holdings Limited** stock to perform well in the short-term. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Buy candidate.

Risk: **High**

Evaluation: **Buy Candidate**
