MACD: Sell

## Tech commentaries:

No changes to the price of **Hung Hing Printing Group Limited** stock on the last trading day (Friday, 31st May 2024). During the last trading day the stock fluctuated **1.85%** from a day low at **HK\$1.08** to a day high of **HK\$1.10**. The price has been going up and down for this period, and there has been a -7.56% loss for the last 2 weeks.

The stock has broken the wide and weak rising short-term trend down. This signalizes a slower rate of rising, but may also be an early warning about a possible trend shift. Due to the trend being broken there will now be resistance at the bottom line of the trend at **HK\$1.10**. A reaction back to this level may hold a second chance to get out before further falls.

A buy signal was issued from a pivot bottom point on **Thursday, May 30, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Hung Hing Printing Group Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **HK\$1.18** and **HK\$1.18**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point".

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance from accumulated volume at **HK\$1.17**, **HK\$1.18** and **HK\$1.19**.

In general the stock tends to have controlled movements and therefore the general risk is considered low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **HK\$0.0200** between high and low, or **1.85%**. For the last week the stock has had daily average volatility of **3.15%**.

The Hung Hing Printing Group Limited stock holds several negative signals and despite the positive trend, we believe **Hung Hing Printing Group Limited** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
