Tech commentaries:

The TC Orient Lighting Holdings Limited stock price fell by -2.31% on the last day (Friday, 17th May 2024) from HK\$0.130 to HK\$0.127. During the last trading day the stock fluctuated 0% from a day low at HK\$0.127 to a day high of HK\$0.127. The price has fallen in 5 of the last 10 days and is down by -2.31% for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by -90 thousand shares and in total, 10 thousand shares were bought and sold for approximately HK\$1.27 thousand.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall -10.36% during the next 3 months and, with a 90% probability hold a price between HK\$0.106 and HK\$0.141 at the end of this 3-month period.

There are mixed signals in the stock today. The TC Orient Lighting Holdings Limited stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at HK\$0.128 and HK\$0.134. A break-up above any of these levels will issue buy signals. Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on Monday, April 22, 2024, and so far it has risen 2.42%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

TC Orient Lighting Holdings Limited finds support from accumulated volume at HK\$0.126 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at HK\$0.130, HK\$0.136 and HK\$0.149.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved HK\$0 between high and low, or 0%. For the last week the stock has had daily average volatility of 0%.

TC Orient Lighting Holdings Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Medium

Evaluation: Hold/Accumulate
