The stock lies in the middle of a falling trend in the short term and further fall within the trend is signaled. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

There are mixed signals in the stock today. The **Asia Allied Infrastructure Holdings Ltd** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. A buy signal was issued from a pivot bottom point on **Monday, June 03, 2024**, and so far it has risen 2.22%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely at it may be a "turning point".

**Asia Allied Infrastructure Holdings Ltd** finds support from accumulated volume at HK\$0.455 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **HK\$0.470**, **HK\$0.475** and **HK\$0.480**.
