Volume:	Sell
MACD:	Sell

Tech commentaries:

The InvesTech Holdings Limited stock price fell by -8.57% on the last day (Friday, 17th May 2024) from HK\$0.350 to HK\$0.320. During the last trading day the stock fluctuated 19.67% from a day low at HK\$0.305 to a day high of HK\$0.365. The price has been going up and down for this period, and there has been a -14.67% loss for the last 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by -2 million shares and in total, 36 thousand shares were bought and sold for approximately HK\$11.65 thousand.

The stock has broken the very wide and strong rising short-term trend down. This signalizes a slower rate of rising, but may also be an early warning about a possible trend shift. Due to the trend being broken there will now be resistance at the bottom line of the trend at HK\$0.336. A reaction back to this level may hold a second chance to get out before further falls.

There are few to no technical positive signals at the moment. The InvesTech Holdings Limited stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at HK\$0.359 and HK\$0.349. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on Thursday, May 09, 2024, and so far it has fallen -15.79%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

InvesTech Holdings Limited finds support from accumulated volume at HK\$0.315 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at HK\$0.350, HK\$0.365 and HK\$0.370.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved HK\$0.0600 between high and low, or 19.67%. For the last week the stock has had daily average volatility of 9.51%.

The InvesTech Holdings Limited stock holds several negative signals and despite the positive trend, we believe InvesTech Holdings Limited will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: Medium

Evaluation: Sell Candidate
