The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise 20.96% during the next 3 months and, with a 90% probability hold a price between **HK\$5.50** and **HK\$6.65** at the end of this 3-month period.

The Xtep International Holdings Limited stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at HK\$5.02 and HK\$4.75. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on Tuesday, April 16, 2024, and so far it has risen 21.15%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

On the downside, the stock finds support just below today's level from accumulated volume at HK\$4.95 and HK\$4.63. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

Xtep International Holdings Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.
