The stock has broken the strong rising the short-term trend up and an even stronger rate of rising is indicated. For any reaction back there will now be support on the roof on the current trend broken at **JP¥6,095.22**, a level that may pose a second chance to hit a runner. According to fan-theory **JP¥6,606.96** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **Takasago Thermal Engineering Co.,Ltd.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

On the downside, the stock finds support just below today's level from accumulated volume at **JP¥5,380.00** and **JP¥5,320.00**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

Takasago Thermal Engineering Co.,Ltd. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Medium**
