Tech commentaries:

The **ABFHK BD IDX FD/UT HKD** stock price gained **0.207%** on the last trading day (Monday, 24th Jun 2024), rising from **HK\$96.60** to **HK\$96.80**. During the last trading day the stock fluctuated **0.207%** from a day low at **HK\$96.60** to a day high of **HK\$96.80**. The price has been going up and down for this period, and there has been a 0.62% gain for the last 2 weeks.

The stock is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **ABFHK BD IDX FD/UT HKD** stock with a 90% probability to be traded between **HK\$97.51** and **HK\$99.08** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **ABFHK BD IDX FD/UT HKD** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **HK\$96.58** and **HK\$96.12**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, June 12, 2024**, and so far it has fallen - 0.155%. Further fall is indicated until a new bottom pivot has been found. Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.

ABFHK BD IDX FD/UT HKD finds support from accumulated volume at **HK\$95.80** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **HK\$96.95**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **HK\$0.200** between high and low, or **0.207%**. For the last week the stock has had daily average volatility of **0.0725%**

Several short-term signals are positive and we conclude that the current level may hold a buying opportunity, as there is a fair chance for **ABFHK BD IDX FD/UT HKD** stock to perform well in the short-term period. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Buy candidate.

Risk: **Low**

Evaluation: **Buy Candidate**
