Tech commentaries:

The **Shenzhen JT Automation Equipment Co.,Ltd** stock price gained **2.88%** on the last trading day (Friday, 28th Jun 2024), rising from **¥11.12** to **¥11.44**. During the last trading day the stock fluctuated **7.04%** from a day low at **¥10.93** to a day high of **¥11.70**. The price has been going up and down for this period, and there has been a **-0.87%** loss for the last 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **2 million** more shares were traded than the day before. In total, **8 million** shares were bought and sold for approximately **¥94.27 million**.

The stock is moving within a very wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Shenzhen JT Automation Equipment Co.,Ltd** stock with a 90% probability to be traded between **¥9.61** and **¥14.39** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Shenzhen JT Automation Equipment Co.,Ltd** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the long-term average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **¥11.50**. On a fall, the stock will find some support from the short-term average at **¥11.33**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Thursday, June 20, 2024**, and so far it has fallen **-4.27%**. Further fall is indicated until a new bottom pivot has been found.

Shenzhen JT Automation Equipment Co.,Ltd finds support from accumulated volume at **¥11.21** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **¥12.35**, **¥12.78** and **¥14.00**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **¥0.770** between high and low, or **7.04%**. For the last week, the stock has had daily average volatility of **7.22%**.

Shenzhen JT Automation Equipment Co.,Ltd holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: Medium
