It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **0.619%** from a day low at **12,125.00** to a day high of **12,200.00**. The stock has broken the narrow and weak rising the short-term trend up and an even stronger rate of rising is indicated. For any reaction back there will now be support on the roof on the current trend broken at **12,097.34**, a level that may pose a second chance to hit a runner. According to fan-theory **12,413.83** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **Mirae Asset Tiger 10 Year U.S. Treasury** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **12,088.57** and **11,862.57**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, May 29, 2024**, and so far it has risen 3.80%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

Mirae Asset Tiger 10 Year U.S. Treasury finds support from accumulated volume at **11,780.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
