## Tech commentaries:

The **Leverage Shares 3x Boeing Etp** ETF price gained **12.29%** on the last trading day (Friday, 28th Jun 2024), rising from **£0.241** to **£0.271**. During the last trading day the ETF fluctuated **0.315%** from a day low at **£0.270** to a day high of **£0.271**. The price has risen in 5 of the last 10 days and is up by **7.1%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **100** more shares were traded than the day before. In total, **100** shares were bought and sold for approximately **£27.09**.

The ETF lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the ETF is expected to fall **-6.24%** during the next 3 months and, with a 90% probability hold a price between **£0.176** and **£0.280** at the end of this 3-month period.

The **Leverage Shares 3x Boeing Etp** ETF holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the ETF has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **£0.242** and **£0.262**. A breakdown below any of these levels will issue sell signals. **Leverage Shares 3x Boeing Etp** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, May 20, 2024**, and so far it has fallen **-12.00%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the ETF finds support just below today's level from accumulated volume at **£0.246** and **£0.235**. On the upside the ETF meets some resistance just above today's level from accumulated volume at **£0.277**, **£0.282** and **£0.303**.

This ETF may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this ETF is considered to be "high risk". During the last day, the ETF moved **£0.0008** between high and low, or **0.315%**. For the last week, the ETF has had daily average volatility of **2.91%**.

**Leverage Shares 3x Boeing Etp** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this ETF since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **High**

Evaluation: **Hold/Accumulate**
