The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **21.73%** during the next 3 months and, with a 90% probability hold a price between **16.09€** and **19.98€** at the end of this 3-month period.

The **Audius Se** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **13.84€** and **13.69€**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Audius Se** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, May 15, 2024**, and so far it has fallen -6.04%. Further fall is indicated until a new bottom pivot has been found.

Audius Se finds support from accumulated volume at **13.50€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **14.20€**, **14.50€** and **14.90€**.

Audius Se holds several positive signals and is within a strong rising trend. As the old saying says, "Let the trend be your friend.". We therefore consider it to be a good choice at these current levels and we are expecting further gains during the next 3 months. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Strong Buy candidate.

Risk: **Medium**

Evaluation: **Strong Buy Candidate**
