The price has been going up and down for this period, and there has been a 1.21% gain for the last 2 weeks. Volume has increased on the last day by **87 thousand** shares but on falling prices. The stock lies in the middle of a falling trend in the short term and further fall within the trend is signaled. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

A buy signal was issued from a pivot bottom point on **Thursday, June 13, 2024**, and so far it has risen 1.52%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **AIR WATER INC.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **JP¥2,179.86** and **JP¥2,215.01**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**AIR WATER INC.** finds support from accumulated volume at **JP¥2,166.50** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
