Tech commentaries:

The **Titan Kogyo Kabushiki Kaisha** stock price gained **0.682%** on the last trading day (Thursday, 27th Jun 2024), rising from **JP¥1,026.00** to **JP¥1,033.00**. It has now gained 5 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **1.47%** from a day low at **JP¥1,018.00** to a day high of **JP¥1,033.00**. The price has risen in 7 of the last 10 days and is up by **3.3%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **2 thousand** more shares were traded than the day before. In total, **4 thousand** shares were bought and sold for approximately **JP¥3.93** million.

The stock has broken the narrow and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **JP¥1,017.74**, a level that may pose a second chance to hit a runner. According to fan-theory **JP¥1,064.05** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **Titan Kogyo Kabushiki Kaisha** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **JP¥1,016.57** and **JP¥1,017.29**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, June 13, 2024**, and so far it has risen 3.30%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

Titan Kogyo Kabushiki Kaisha finds support from accumulated volume at **JP¥1,025.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **JP¥1,036.00**, **JP¥1,040.00** and **JP¥1,067.00**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **JP¥15.00** between high and low, or **1.47%**. For the last week the stock has had daily average volatility of **1.19%**.

Titan Kogyo Kabushiki Kaisha holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
