The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, April 26, 2024**, and so far it has fallen **-6.10%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.
