The stockhas broken the wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **JP¥311.65**, a level that may pose a second chance to hit a runner. According to fan-theory **JP¥346.59** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

Mostly positive signals in the chart today. The **Yuki Gosei Kogyo Co.,Ltd.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. A buy signal was issued from a pivot bottom point on **Friday, April 19, 2024**, and so far it has risen 9.09%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

Several short-term signals are positive and the break-up from the falling trend indicates a possible shift for a trend. We believe that the prices around the breaking point will indicate particularly good levels, but we also believe that the current level will hold a possible good buy level for the short-term period. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Buy candidate.
