Given the current short-term trend, the stock is expected to rise **92.13%** during the next 3 months and, with a 90% probability hold a price between **\$23.44** and **\$35.56** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Sichuan Mingxing Electric Power Co.**, stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. A sell signal was issued from a pivot top point on **Wednesday, May 29, 2024**, and so far it has fallen **-22.78%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.
