It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **2.16%** from a day low at **\$20.36** to a day high of **\$20.80**. The price has risen in 6 of the last 10 days and is up by **2.23%** over the past 2 weeks. The stock lies in the middle of a strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **23.11%** during the next 3 months and, with a 90% probability hold a price between **\$24.81** and **\$26.77** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Grandblue Environment Co., Ltd.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$20.39** and **\$19.62**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, May 23, 2024**, and so far it has risen 10.57%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

**Grandblue Environment Co., Ltd.** finds support from accumulated volume at \$19.74 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
