## Tech commentaries:

The **Tande Co., Ltd.** stock price fell by **-6.33%** on the last day (Thursday, 4th Jul 2024) from **\$2.37** to **\$2.22**. During the last trading day the stock fluctuated **6.76%** from a day low at **\$2.22** to a day high of **\$2.37**. The price has risen in 6 of the last 10 days but is still down by **-1.33%** for this period. Volume has increased on the last day by **2 million** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **16 million** shares were bought and sold for approximately **\$35.90 million**.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$1.94** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-7.07%** during the next 3 months and, with a 90% probability hold a price between **\$1.80** and **\$3.16** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Monday, June 24, 2024**, and so far it has risen 2.78%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Tande Co., Ltd.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$2.29** and **\$2.59**. A break-up above any of these levels will issue buy signals. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**Tande Co., Ltd.** finds support from accumulated volume at **\$2.17** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$2.37**, **\$2.67** and **\$2.70**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.150** between high and low, or **6.76%**. For the last week, the stock has had daily average volatility of **4.89%**.

**Tande Co., Ltd.** holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
