Tech commentaries:

The **Shanghai CDXJ Digital Technology Co.**, stock price fell by **-7.62%** on the last day (Friday, 28th Jun 2024) from **\$5.64** to **\$5.21**. During the last trading day the stock fluctuated **9.02%** from a day low at **\$5.10** to a day high of **\$5.56**. The price has risen in 6 of the last 10 days and is up by **15.27%** over the past 2 weeks. Volume has increased on the last day by **31 million** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **41 million** shares were bought and sold for approximately **\$214.79 million**.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-16.31%** during the next 3 months and, with a 90% probability hold a price between **\$3.28** and **\$4.70** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

The **Shanghai CDXJ Digital Technology Co.**, stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$4.84** and **\$4.84**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, June 27, 2024**, and so far it has fallen **-7.62%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Shanghai CDXJ Digital Technology Co., finds support from accumulated volume at **\$5.15** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$5.42**, **\$6.23** and **\$6.31**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.460** between high and low, or **9.02%**. For the last week, the stock has had daily average volatility of **7.84%**.

Shanghai CDXJ Digital Technology Co., holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **High**

Evaluation: **Hold/Accumulate**
