Tech commentaries:

The **TERASAKI ELECTRIC CO.,LTD.** stock price fell by **-0.0417%** on the last day (Wednesday, 26th Jun 2024) from **JP¥2,400.00** to **JP¥2,399.00**. During the last trading day the stock fluctuated **4.25%** from a day low at **JP¥2,398.00** to a day high of **JP¥2,500.00**. The price has been going up and down for this period, and there has been a 2% gain for the last 2 weeks. Volume has increased on the last day by **11 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **62 thousand** shares were bought and sold for approximately **JP¥149.22** million.

The stock is at the upper part of a very wide and horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **JP¥2,428.97** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **TERASAKI ELECTRIC CO.,LTD.** stock with a 90% probability to be traded between **JP¥1,882.98** and **JP¥2,444.38** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **TERASAKI ELECTRIC CO.,LTD.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **JP¥2,364.43** and **JP¥2,132.97**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, June 14, 2024**, and so far it has fallen **-1.15%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

On the downside, the stock finds support just below today's level from accumulated volume at **JP¥2,038.00** and **JP¥1,946.00**. On the upside the stock meets some resistance just above today's level from accumulated volume at **JP¥2,400.00**, **JP¥2,405.00** and **JP¥2,427.00**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **JP¥102.00** between high and low, or **4.25%**. For the last week, the stock has had daily average volatility of **4.17%**.

TERASAKI ELECTRIC CO.,LTD. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: High
