## Tech commentaries:

The **KEYENCE CORPORATION** stock price fell by **-1.54%** on the last day (Wednesday, 1st May 2024) from **JP¥70,300.00** to **JP¥69,220.00**. During the last trading day the stock fluctuated **1.39%** from a day low at **JP¥69,060.00** to a day high of **JP¥70,020.00**. The price has risen in 6 of the last 10 days and is up by **6.17%** over the past 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-386 thousand** shares and in total, **522 thousand** shares were bought and sold for approximately **JP¥36.15** billion.

The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-3.61%** during the next 3 months and, with a 90% probability hold a price between **JP¥60,028.77** and **JP¥70,435.90** at the end of this 3-month period.

The **KEYENCE CORPORATION** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **JP¥66,817.14** and **JP¥67,755.71**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, April 30, 2024**, and so far it has fallen **-1.54%**. Further fall is indicated until a new bottom pivot has been found. Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

**KEYENCE CORPORATION** finds support from accumulated volume at **JP¥67,860.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **JP¥69,610.00**, **JP¥70,300.00** and **JP¥72,900.00**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **JP¥960.00** between high and low, or **1.39%**. For the last week, the stock has had daily average volatility of **2.13%**.

**KEYENCE CORPORATION** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
