Trend: MV Long: MV Short: Buy Volume: MACD: Buy

## **Tech commentaries:**

No changes to the price of Tasty Concepts Holding Ltd stock on the last trading day (Monday, 13th May 2024). During the last trading day the stock fluctuated 0% from a day low at HK\$0.141 to a day high of HK\$0.141. The price has been going up and down for this period, and there has been a 48.42% gain for the last 2 weeks.

The stockhas broken the very wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is HK\$0.139, a level that may pose a second chance to hit a runner. According to fan-theory HK\$0.208 will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The Tasty Concepts Holding Ltd stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at HK\$0.142. On a fall, the stock will find some support from the short-term average at HK\$0.140. A break-up through the longterm average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on Friday, May 10, 2024, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Tasty Concepts Holding Ltd finds support from accumulated volume at HK\$0.140 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved HK\$0 between high and low, or 0%. For the last week the stock has had daily average volatility of 0%

Tasty Concepts Holding Ltd holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

**Evaluation: Hold/Accumulate**
