Tech commentaries:

No changes to the price of **Taka-Q Co.,Ltd.** stock on the last trading day (Thursday, 2nd May 2024). During the last trading day the stock fluctuated **2.35%** from a day low at **JP¥85.00** to a day high of **JP¥87.00**. The price has fallen in 6 of the last 10 days and is down by **-16.35%** for this period.

Given the current short-term trend, the stock is expected to rise **51.47%** during the next 3 months and, with a 90% probability hold a price between **JP¥131.78** and **JP¥223.83** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Taka-Q Co.,Ltd.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **JP¥92.86** and **JP¥93.83**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Wednesday, April 10, 2024**, and so far it has fallen -35.56%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days.

On the downside, the stock finds support just below today's level from accumulated volume at **JP¥68.00** and **JP¥67.00**. On the upside the stock meets some resistance just above today's level from accumulated volume at **JP¥91.00**, **JP¥106.00** and **JP¥107.00**.

This stock may move very much during the day (volatility) and with a very large prediction interval from the Bollinger Band this stock is considered to be "very high risk". During the last day, the stock moved **JP¥2.00** between high and low, or **2.35%**. For the last week, the stock has had daily average volatility of **4.02%**.

The Taka-Q Co.,Ltd. stock holds several negative signals and despite the positive trend, we believe **Taka-Q Co.,Ltd.** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: Very High

Evaluation: Sell Candidate
