## Tech commentaries:

The **KYOKUTO SECURITIES CO.,LTD.** stock price gained **0.266%** on the last trading day (Friday, 26th Apr 2024), rising from **JP¥1,504.00** to **JP¥1,508.00**. During the last trading day the stock fluctuated **2.55%** from a day low at **JP¥1,490.00** to a day high of **JP¥1,528.00**. The price has been going up and down for this period, and there has been a 1.34% gain for the last 2 weeks. Volume fell on the last day by **-440 thousand** shares and in total, **344 thousand** shares were bought and sold for approximately **JP¥518.75** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the lower part of a very wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at JP¥1,486.16 is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **55.94%** during the next 3 months and, with a 90% probability hold a price between **JP¥2,317.56** and **JP¥3,282.78** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **KYOKUTO SECURITIES CO.,LTD.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **JP¥1,532.14** and **JP¥1,519.94**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Monday, March 25, 2024**, and so far it has fallen -16.59%. Further fall is indicated until a new bottom pivot has been found.

**KYOKUTO SECURITIES CO.,LTD.** finds support from accumulated volume at JP¥1,505.00 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **JP¥1,589.00**, **JP¥1,688.00** and **JP¥1,746.00**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **JP¥38.00** between high and low, or **2.55%**. For the last week, the stock has had daily average volatility of **3.29%**.

The **KYOKUTO SECURITIES CO.,LTD.** stock holds several negative signals and despite the positive trend, we believe **KYOKUTO SECURITIES CO.,LTD.** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock. We have upgraded our analysis conclusion for this stock since the last evaluation from a Strong Sell to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
