Tech commentaries:

No changes to the price of **MARUWN CORPORATION** stock on the last trading day (Thursday, 2nd May 2024). During the last trading day the stock fluctuated **1.08%** from a day low at **JP¥277.00** to a day high of **JP¥280.00**. The price has risen in 5 of the last 10 days.

The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **2.17%** during the next 3 months and, with a 90% probability hold a price between **JP¥271.25** and **JP¥300.22** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Friday, April 26, 2024**, and so far it has risen 2.20%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **MARUWN CORPORATION** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **JP¥282.20**. On a fall, the stock will find some support from the short-term average at **JP¥278.29**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days.

MARUWN CORPORATION finds support from accumulated volume at JP¥278.00 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **JP¥280.00**, **JP¥283.00** and **JP¥287.00**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **JP¥3.00** between high and low, or **1.08%**. For the last week the stock has had daily average volatility of **1.53%**.

MARUWN CORPORATION holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
