The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-3.52%** during the next 3 months and, with a 90% probability hold a price between **28.44 Fr** and **34.59 Fr** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Adecco Group AG** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **31.37 Fr** and **33.67 Fr**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, May 16, 2024**, and so far it has fallen **-15.42%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Adecco Group AG finds support from accumulated volume at **30.66 Fr** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **31.34 Fr**, **34.14 Fr** and **34.46 Fr**.

Adecco Group AG holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.
