Tech commentaries:

No changes to the price of **ADVA Optical Networking SE** stock on the last trading day (Tuesday, 25th Jun 2024). During the last trading day the stock fluctuated **0.508%** from a day low at **19.70€** to a day high of **19.80€**. The price has been going up and down for this period, and there has been a **-0.2%** loss for the last 2 weeks.

The stock is at the lower part of a narrow and horizontal trend in the short term, and normally this may pose a good buying opportunity, though a breakdown through the bottom trend line at **19.77€** will give a strong sell signal and a trend shift may be expected. Given the current horizontal trend, you can expect **ADVA Optical Networking SE** stock with a 90% probability to be traded between **19.64€** and **19.93€** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Tuesday, June 18, 2024**, and so far it has risen **0.101%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **ADVA Optical Networking SE** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **19.81€** and **19.92€**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point".

ADVA Optical Networking SE finds support from accumulated volume at **19.78€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **19.96€**, **19.98€** and **20.00€**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **0.100€** between high and low, or **0.508%**. For the last week the stock has had daily average volatility of **0.426%**.

ADVA Optical Networking SE holds several negative signals and is within a narrow and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
