Tech commentaries:

The **Australian Ethical Investment Ltd.** stock price gained **4.37%** on the last trading day (Friday, 3rd May 2024), rising from **\$4.35** to **\$4.54**. During the last trading day the stock fluctuated **4.59%** from a day low at **\$4.36** to a day high of **\$4.56**. The price has been going up and down for this period, and there has been a **-3.61%** loss for the last 2 weeks. Volume fell on the last day by **-72 thousand** shares and in total, **102 thousand** shares were bought and sold for approximately **\$461.28 thousand**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-10.22%** during the next 3 months and, with a 90% probability hold a price between **\$3.90** and **\$4.47** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

A buy signal was issued from a pivot bottom point on **Thursday, May 02, 2024**, and so far it has risen 4.37%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Australian Ethical Investment Ltd.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$4.68** and **\$4.80**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may also not.

Australian Ethical Investment Ltd. finds support from accumulated volume at **\$4.48** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$4.55**, **\$4.89** and **\$4.90**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **\$0.200** between high and low, or **4.59%**. For the last week the stock has had daily average volatility of **4.36%**.

Australian Ethical Investment Ltd. holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. We have upgraded our analysis conclusion for this stock since the last evaluation from a Strong Sell to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
